## Hospital Donation

The Owen Sound General and Marine Hospital has five new stainless-steel intravenous poles. The hospital acquired the poles through a donation made by the North-Grey branch of the Junior Women's Institute of Ontario. The North-Grey Junior Institute, formed in November 1974, has 30 members; young women in the Owen Sound area who are interested in self development and community service. Their motto "For Home & Country" has been exemplified by their donation to the hospital which was accepted by Catherine Smith, Nursing Supervisor.
